

I am writing to express my interest in applying for the Student Summer Research Fellowship at ETH Zurich. As a student passionate about electrical engineering and computer architecture, I am eager to gain hands-on experience in this field, which is an essential foundation for my long-term goal of pursuing a PhD in Electrical Engineering with a focus on computer architecture. This internship will offer me a unique opportunity to deepen my understanding of computer architecture. This area fascinates me due to its complexity and the critical role it plays in advancing technological innovation.

My curiosity for the underlying operation of computers has shaped my academic journey. In particular, I have been captivated by the intricacies of computer architecture—the design of processors, memory hierarchies, and overall system performance. Through my coursework and personal projects, I have developed a strong foundation in digital logic and computer systems. However, I recognize that true expertise can only be developed through hands-on experience. The internship at ETH Zurich represents a valuable opportunity to bridge this gap and work alongside experts at the forefront of research in the field.

At ETH Zurich, I plan to contribute to ongoing research while expanding my knowledge of processor design, system-level optimization, and emerging computing paradigms. I am particularly excited about the prospect of working in a world-class research environment that will allow me to collaborate with peers and mentors who share my passion for advancing computer architecture. By learning from renowned professors and researchers such as Torsten Hoeftler and Onur Mutlu, I aim to hone my analytical skills, deepen my technical expertise, and develop critical thinking abilities essential for academic success.

This internship will enhance my understanding of computer architecture and is an important step toward pursuing a PhD. The experience will provide valuable insights into the research process, including problem-solving, experimental design, and collaboration, which will be invaluable as I embark on my doctoral studies. Moreover, the skills and knowledge I gain at ETH Zurich will equip me to contribute meaningfully to the field of electrical engineering.

In conclusion, I am eager to immerse myself in the research opportunities offered by ETH Zurich and to build a solid foundation for my academic and professional future. I am excited about the potential to learn, collaborate, and contribute to cutting-edge research in computer architecture. This internship will be pivotal in my development as a researcher and future PhD candidate.

Thank you for considering my application. I look forward to joining your research community and contributing to the ongoing advancements in this exciting field.
